

Urine Drug Testing in Addiction Treatment

Join Nelson Hardiman and the [American Addiction Treatment Association](#)

[\(AATA\)](#) on November 23rd to ensure that your addiction treatment program is alert to the compliance risks and using UDT appropriately.

There are certain components of running an addiction treatment facility that might seem so straightforward, self-explanatory, and uncomplicated that you don't give them a second thought. Urine drug testing (UDT) is likely one of those.

We will focus on issues that have arisen around UDT compliance in today's climate, including:

- Compliance risks
- Compliance strategies
- CLIA certification
- Medical necessity
- Insurance coverage
- Insurance reimbursement
- The role of physicians in UDT
- Notable cases of fraud and how they've shaped regulation

Stop feeling vague anxiety about that wide net and how it might impede your business. Instead, choose the empowering safety of compliance. Join us to ensure that you are fully apprised of UDT compliance risks and that your addiction treatment program is using UDT appropriately.

When: November 23, 2016 at 12pm – 12:45pm

Where: This event is online

Pricing: \$25
