Leading Healthcare Attorney Issues Opioid Crisis Call to Action

On March 26, 2019, Forbes announced the release of its latest title: The United States of Opioids: A Prescription for Liberating a Nation in Pain.

Co-Founder and Managing Partner Harry Nelson drew from his decades of experience responding to overdose deaths and solving problems related to pain prescribing and addiction treatment to pen this detailed look at the opioid crisis and strategies for the way out.

> “Before we can solve the opioid crisis, we all need to understand it—not just policy wonks, doctors, and law enforcement, but also educators, employers, parents and peers,” Nelson explained. “We have work to do to empower people to be part of the work ahead of us.”

The book is available now on Amazon.
