

Current Trends in Payer Landscape: Value-Based Reimbursement

Event: Autism Investor Summit

Date & Time: February 11, 2020 from 1:30 – 2:30 PM

Speakers: [Harry Nelson](#), James Craig, Yagnesh Vadgama, Richard Fish

Across the continuum of government, commercial and employer-sponsored health plans, services for people with autism spectrum disorder (ASD) continues to move gradually towards value-based models of reimbursement. While those models represent the future from a payer perspective, ASD treatment providers must also navigate the “here and now” challenges of traditional fee-for-service models. This panel will offer both payor and provider insights into (a) current payor-provider points of conflict and challenges in ASD treatment; (b) leading trends in ASD reimbursement (including visions of movement towards value-based reimbursement ahead); and (c) analysis of the critical issues for ASD treatment reimbursement in an increasingly value-based world.
